GENERAL SUMMARIZING NOTES DESCRIBING THE STRUCTURE

The Hotel accessibility is influenced by 2 external steps, that can be overcome by a removable ramp that helps with the first step.

Inside of the hotel there are no particular problems to mobility, step to the Reception area is overcome by a ramp with slope of approximately 6% that leads to the elevator, and the breakfast hall.

The hotel has 3 wide accessible rooms with bathroom inside, one on the ground floor and two on the third floor.

The inner pathways are regular, the escape way lead to the elevator or to the main stairway of the hotel, both leading directly at the entrance of the hotel or to a second emergency exit influenced by a step.

The hotel has an agreement with a paying garage parking service that picks-up/return the car on demand

PARKING LOT / CAR PARK

HOTEL EDEN

Type of parking lot: Garage
Paying
Covered
